Job Description: Graduate Power Platform Developer (MC531) - Permanent

Department: Global Business Systems (IT)

Job role overview:

Triumph is seeking a Junior Power Platform Developer to join our integrated and dynamic team. This is an exciting opportunity to work with cutting-edge technology and make a real impact in a global multinational business experiencing continued growth. Triumph has deployed Microsoft Dynamics and this new role will be key in the growth and success of the solution. This role is an immediate start position.

Report to: Work Stream Manager

Location: F2 Hinckley

Duties and Responsibilities:

About the Role
As a Junior Power Platform Developer, you will:
- Collaborate with Work Stream Managers (Business Analysts) and Solution Architects to design, develop, and implement Power Apps solutions.
- Translate business requirements into effective Power Platform solutions that deliver a seamless user experience.
- Support Triumph's growth using Microsoft Dynamics CRM platform.
- Receive comprehensive training in core Power Platform tools, with a clear development plan to build your skills and career.

Power Apps Development:
- Working with the solution architect, make updates to existing Power app solutions. Under guidance create canvas apps and model-driven apps using Power Platform to meet business requirements.
- Collaborate with Work Steam Managers & Solution Architect teams to support the design and implementation of user interfaces that enhance user experience.
- Write clean, maintainable documentation

Data Integration:
- Work with the team's Data Engineer to connect Power Apps to various data sources, such as SharePoint, SQL Server, and Common Data Service.
- Build data models under the guidance of Triumph's data engineer and establish relationships within the Power Platform.

Power Automate (Flow):
- Develop automated workflows using Power Automate to streamline business processes.
- Integrate Power Apps with Power Automate for efficient automation.

Collaboration and Communication:
- Collaborate with cross-functional teams and stakeholders to understand business needs with guidance from the Work Stream Managers.
- Work with the solution architect to communicate effectively to gather requirements, provide updates, and present solutions.

Continuous Learning:
- Stay updated on the latest Power Platform features and industry best practices.
- Actively participate in training and professional development opportunities.

Person Specification: Graduate Power Platform Developer (MC531) - Permanent
